FOOD CONTAINER, MODEL GB-7 COMPACT OPERATION MAINTENANCE SHEET

Procedures for Optimum Temperature Holding & Performance

Preheating of the container is unnecessary; however, for optimum performance the following steps are recommended.

- Fill the stainless steel container with hot water (max. 90°C) 30 minutes prior to inserting desired HOT food. For cold food chill the stainless steel container in a refrigerator, freezer, or by filling with chilled water.
- Place the desired food inside the stainless steel liner and fill till the liner is full.
- Secure the inner & outer lid to the container as quickly as possible.
- Using the provided labels, mark the contents of each container.
- Non-prepackaged (processed) food must be stored in Gastronorm-containers with sealed lid.

Care & Cleaning

- Clean the containers (stainless steel and plastic) after each use by using a neutral detergent.
- Remove gasket for cleaning regularly. Clean gasket with a neutral detergent and a thin barrel brush.
- Container may be run through a dishwasher with temperature up to 90°C with no adverse effects to the components. Remove gasket from outer lid before washing in a dishwasher.
- Allow unit to air dry after cleaning and reassemble unit.
